

Outport Namer

Wednesday, August 15, 2018 6:40 PM

Names the outport with the corresponding subsystem output.

Eksikler

Çoklu düzeltme çalışmıyor.

outputName

```
connectivity=get_param(gcf,'PortConnectivity');  
subsysName = get_param(connectivity.SrcBlock,'Name');  
portNum = connectivity.SrcPort;
```

```
outports = find_system([gcs,'/',subsysName],'BlockType','Outport');
```

```
newName=get_param(outports(portNum + 1),'Name');  
set_param(gcf,'Name',newName{1});
```
